DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1,3-5, and 8-35 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The amendment in question is the phrase "at least one non-chelating agent". Applicant has failed to point specifically to where support for this amendment is in the specification. Applicant states that it can be found throughout the application, including the Exemplification. The examiner did not find any support for this language. There is even ambiguity in the specification as to which ligands are chelating and which ligands are not. On page 34 line 19 applicant actually states "but probably still chelating ligands" when discussing certain bulky and less electron donating ligands. In addition, on pages 34-37 applicants constantly refers to chelating ligands being used. Therefore, applicant has not demonstrated that at the time that this application was filed that the inventive concept of a Group 8 metal with a non-chelating ligand was in his possession. If supports for this amendment exist applicant is requested to explicitly point to where in the specification such language exist.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1, 3-5 and 8-35 rejected under 35 U.S.C. 102(a) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hartwig et al (US 6,057,456). For reasons see previous office action. Since no support for the amendment exist the previous rejection remains valid.
